1. Personal Services

The Klamath Falls Targeted Airshed Grant supports several professional, technical, management and administrative staff in the DEQ Air Quality Division. Based on an analysis of staff involved in this grant's work, DEQ used the following representative classification types to develop the grant personal services budget: Principal Manager E, Natural Resource Specialist 2, Natural Resource Specialist 3, Natural Resource Specialist 4, and Operations & Policy Analyst 3. DEQ estimates the Klamath Falls Targeted Airshed Grant will support 38.40 months of work (1.600 FTE). Months of work and FTE are rounded for display purposes.

2. Fringe Benefits

Fringe benefits are shown as a percentage of personal service salary amounts, and comprised of a combination of several factors such as FICA/Medicare = 7.65%, Pension Costs = 25.09%, Medical/Dental, Workman's Comp., and Unemployment = \$1,394 /month.

3. Travel

4. Equipment

The addition of a ceilometer (cost is approximately \$35,000 each) to DEQ's monitoring site will allow DEQ over time, as historical mixing height and air quality data are correlated, to be able to forecast air quality with greater accuracy. The nearest National Weather Service Station and mixing height measurement is in Medford, Oregon, which is on the other side of the southern Cascade mountains and provides less than ideal mixing height estimates. This data is vital in determining an accurate wood stove advisory for each winter day during the wood heating season.

5. Supplies

Typical categories of Office Supplies are: Paper, pens, pencils, staplers, & misc. desktop items. Also, reusable items purchased for under \$5,000 (and that have a useful life beyond a year) are categorized as Expendable Property & IT Expendable Property. Items typically found in this category are personal computers and related software, office furniture, and expensed technical equipment when related to laboratory work. Cost estimates for these items are based on an average monthly cost per FTE. These costs are not included in the indirect rate.

6. Contractual

This request does not include Contractual costs.

7. Construction

This request does not include Construction costs.

8. Other

The service costs in "Other" have been updated and are based on annualized actual historical costs for the rolled-up categories required by EPA for planning and reporting. These estimates are derived from a wide range of different DEQ program activities. Some specific activities have higher costs in some categories, whereas others have lower costs. On the average, however, our estimates for TOTAL S&S costs are close to the costs actually incurred in the course of completing our work. None of the costs within this category are included in the indirect rate.

Employee Training

This category comprises expenses related to training and professional development such as tuition, books, periodicals, other training materials, professional associations, and incidental travel.

Telecommunications

Cost estimates for telecommunications are based on an average monthly cost per FTE.

Data Processing Services

Typical data processing service charges are comprised of computer mainframe support, server support, peripheral support, and computer processing support. Cost estimates for data processing services are based on an average monthly cost per FTE.

Facilities Rental

Cost estimates for facilities rental are based on an average monthly cost per FTE.

Fuels & Utilities

Cost estimates for fuels & utilities are based on an average monthly cost per FTE.

Facility Maintenance

Cost estimates for facility maintenance are based on an average monthly cost per FTE.

Other Services

- Postal & delivery services
- Other miscellaneous office services (such as equipment relocation)
- Rental of office equipment
- State of Oregon Motor Pool Assessment Allocation (based on usage)

Agency Program Related Services & Supplies

DEQ and KCPH propose to install low cost air monitoring sensors in schools for community monitoring. The focus would be on education and improved spatial surveillance. (\$3,500 per SensOR $^{\text{TM}}$ for five monitors plus one backup, \$6,000 for additional supplies, and additional staffing for community outreach, training, and technical assistance).

Subawards

 Payments will be passed through to Klamath County Public Health, South Coast Economic Development District, Oregon Institute of Technology, Basin Transportation Services, Klamath Falls School District, Klamath County School District, and Oregon Child Development Coalition in accordance with the Work Plan.

9. Overhead/Indirect

The indirect rate of 21.70% is documented in an indirect cost rate negotiation agreement with EPA.
